Just wondering if AEM EMS V1 is able to connect to a windows 10 tablet/pc? I am planning on doing this setup Serial --> Adapter --> USB --> Tablet running AEM software. Was looking and couldn't find answer if this setup works. Thank you in advance,

AEM EMS v1 - windows 10 support | AEM
The AEM EMS is unique compared to other ECUs in the way that telemetry is not enabled to be on from the factory. Telemetry configuration is relatively complex. The following instructions details this process step by step. To enable CAN telemetry: Open the program “AEM Tuner” (it can be downloaded here). Connect USB cable to laptop.

(AEM EMS only) Enable & Configure CAN Telemetry – gaugeART.com
a) Plug the factory wiring harness into the AEM EMS and position it so the wires are not pulled tight or stressed in any manner. Secure the EMS with the provided Velcro fasteners. b) Plug the comms cable into the EMS and into the PC (not supplied). c) Install the supplied AEM CD and open the AEMPro software.

Boost comp []. I cannot take credit for this. This was originally posted by BLKMGK and Wadzii on the aem ems forums (hope you guys dont mind this being regurgitated!). This is a repost of their explanation of this simple, yet effective method: You need to get the car running and driving first before you can do this.
