Faculty research in the Department of Biology and Wildlife spans the breadth of the biological sciences, from molecular biology to ecosystem science. Investigating emerging viral pathogens, microbes that detoxify environmental contaminants, the molecular genetics of obesity and diabetes, impacts of climate change on polar organisms and ecosystems, and more, our faculty work alongside graduate, undergraduate and high school students to address key issues of vital interest to Alaska and beyond.

Biology & Wildlife Department (UAF)::HOME

Wildlife biology is the study of animals and animal behavior in their natural habitat. Wildlife biologists often work in research or wildlife conservation roles, within agencies such as the U.S. Fish and Wildlife Service. They may also work in environmental research firms, zoos or in higher education.
