Designed for a new generation of readers, Stanley's Earth System History is a reforging of his Exploring Earth and Life Through Time. Adopting an earth system approach throughout, Earth System History shows students how Earth's ecosystem has developed over time and how events in the past provide a perspective for dealing with present and future changes.

Earth System History, 2nd Edition: Stanley, Steven M ...

3. Apply this knowledge to analyzing the primary literature of Earth system history; and 4. Explain the key events of Earth history in the context of the interactions of the components of the Earth system; 5. Place current changes in the Earth system, such as climate change and biodiversity loss, in their historic perspective.

Earth System History

The geological history of Earth follows the major events in Earth's past based on the geological time scale, a system of chronological measurement based on the study of the planet's rock layers (stratigraphy). Earth formed about 4.54 billion years ago by accretion from the solar nebula, a disk-shaped mass of dust and gas left over from the formation of the Sun, which also created the rest of ...

Geological history of Earth - Wikipedia

Earth formed around 4.54 billion years ago, approximately one-third the age of the universe, by accretion from the solar nebula. Volcanic outgassing probably created the primordial atmosphere and then the ocean, but the early atmosphere contained almost no oxygen.

History of Earth - Wikipedia

According to the solar nebula theory, the Earth and other planets in the solar system formed about 4.57 billion years ago by condensation of interplanetary dust. The Sun is a star that formed at the center of our solar system about 4.6 billion years ago.

Earth System: History and Natural Variability - Vol. I

The early evolution of the solid Earth and its atmosphere and oceans is covered in geologic history of Earth. The geologic and biological development of Earth, including its surface features and the processes by which they are created and modified, are discussed in geochronology, continental landform, and plate tectonics.
