David Bohm was a near-great physicist of the twentieth century. Were it not for a flirtation with Communism in his youth, a dalliance that got him blacklisted in this country, he would have spent his career working with the likes of Wigner, Feynman, Oppenheimer and Einstein and might well have won his own Nobel Prize.

Bohm could make sense of many quantum phenomena in this way. Before he died, he completed, together with Hiley, a comprehensive theory that can account for all the known facts in a far less paradoxical fashion than had been thought possible. - John Cobb, The Potential Contribution of Process Thought, June 24, 2003 David Bohm on the Implicate Order
