The Worldwide Crisis in Fisheries : Economic Models and ...

The popularity of fish protein, in addition to an ever-growing world population, has led to a fishery crisis that spans the globe - and will only worsen if something isn't done. Global fish stocks are in trouble. Thanks mainly to consumer habits and current industry practices, fish stock numbers are dwindling fast.

Fisheries are in Crisis. Here's How It Affects Us All ...

We recently came across this hard-hitting fishing infographic that describes (in very simple terms) why global fisheries are in a crisis, and we felt that it was our duty to pass it along. As someone that relies on fish to feed my family (in numerous respects), this was a bit alarming to see just how much stress we have put on our fisheries over the years.

Why Global Fisheries Are In A Crisis (Infographic)
